

GENERAL INFORMATION

Princeton is a city covering an area of approximately 4 square miles located on the border of Mille Lacs and Sherburne Counties. Current population is approximately 4,200 persons. Located at the intersection of T.H. 169 and T. H. 95, the City expects a strong single family and multiple family market to continue.

A progressive community, Princeton offers the right combination of a free standing, yet metropolitan accessible community. In the central part of the City, the Rum River shoreland and rolling topography creates a unique natural setting. A comprehensive trail plan has been proposed and redevelopment of commercial areas initiated. Coupled with the unique natural environment, it is the City's desire to build a quality community. The Planning Commission and City Council have amended ordinances and adopted plans and policies to assure this will happen. Access to transportation, coupled with proximity to the metro area and a progressive development attitude have resulted in a proportionately strong industrial employment and tax base.

The result of this has been continued acceleration of housing values. Princeton is a developing, high-amenity community where investments will be protected with rigid development standards and strong and practical community goals.

If you want to live and work in a progressive community, in a city with increasing property values, and in an atmosphere promoting quality, then welcome to Princeton.
